Precut Lengths with Drawstrings

**The Premium Sheared Surface
Dampening Cover**
for Duplicators, Sheetfed, and Web Presses

NOVATECH
GRAPHIC INDUSTRIES

DUROWEAVE™

Dampening Covers

ORDERING INFORMATION

1) Duroweave Dampening Covers are available in cut lengths with drawstrings sewn on both ends for duplicators, small sheetfed, and smaller web presses.

Duroweave is packaged and sold in sizes to fit individual makes and models of presses and also in five Universal Sizes, "A" through "E", to fit a range of presses that share common roller lengths and diameters. Ductor and form covers are packaged and sold individually -- sets consisting of one form and one ductor cover are not available.

All Duroweave cut covers are packaged in our exclusive Slip-Mount bags unless noted otherwise. This unique containment device functions as a mounting tube as well.

2) To order, first locate the press make and model on pages 3 through 5. If a dollar amount is listed in the

number/price column, order the Duroweave cover by the part number indicated. If a Universal Size is referenced (example: "Size B - See Page...") use the part numbers listed on page 6 (for Ductor Covers) and/or page 7 (for Form Covers).

3) Some presses are marketed under more than one brand or name. The primary or manufacturer's name will be listed under the "Press Make" heading while any secondary brands will be in parentheses under the "Also Fits Press Models" heading.

4) Duroweave is carefully sized to fit the roller dimensions of the original press manufacturer. Presses equipped with other brands of replacement rollers, which often vary in length or diameter, may result in an imperfect fit. If available, kindly provide the roller dimensions (diameter or circumference, and length) when ordering to ensure a proper fit.
