F = Form Roller      M = Metering Roller      O = Oscillating Roller      GCA = Gear Clutch Assembly

\*Before a Kompac II for a ATF Chief 15 or 17 is ordered, the customer will need to provide the machines serial number. If the serial number has a 3 digit prefix (i.e. xxx-xxxx) a "G" version of the Kompac II unit is required. If the machines serial number has a 2 digit prefix (i.e. xx-xxx) a "non G" version of the Kompac II unit is required.

If the serial number is unclear you can also identify the "G" model by the color and size of the gear:

ATF15      -      White Gear (1/4")  
 ATF15G      -      Black Gear (3/8")  
 ATF17      -      Silver Gear (1/4")  
 ATF17G      -      Gold Gear (3/8")

These Kompac Models use Kompac II Seals & Cleaning Seals. To reorder use Part Number's:

KII Seals (1 Pack)                      92370                      KII Cleaning Seals (24 Pack)                      93930  
 KII Seals (10 Pack)                      92180

## REFRIGERATED & NON-REFRIGERATED RECIRCULATORS

PRESS MODEL	MODEL	PART #	PRICE
KOMPAC II MODELS	8 GALLON NON-REFRIGERATED (1 & 2 Color)	97006	\$1,094.50
KOMPAC II & III MODELS	8 GALLON REFRIGERATED (1 & 2 Color)	97332	\$3,624.50
KOMPAC III & V MODELS	16 GALLON REFRIGERATED (1 & 2 Color)	97017	\$5,494.50

### 8 GALLON NON-REFRIGERATED

Features continuous circulation and filtration while insuring a constant supply of fresh fountain solution resulting in less contamination and higher quality. The stainless steel construction and high performance, corrosion resistant pump allows for long life and years of maintenance free operation. This low profile & affordable circulator is the perfect fit for your single and 2/color presses.

### 8 AND 16 GALLON REFRIGERATED

Features one (8 gallon) or two (16 gallon) corrosion resistant pumps featuring an AC motor for long life and quiet operation. The stainless steel construction maintains the highest level of quality and a clean appearance.

The control panel features:

- One touch digital temperature control
- Easy to read led display
- Individual pump and chiller control

These 8 and 16 gallon refrigerated recirculators are a perfect fit for 1-2 print units where a minimum fluid temperature of 55° is desired.

The Kompac Kwik Kolor ink fountain allows for quick and precise ink settings for faster start-ups and reduction of paper waste. It also reduces clean-up time between color changes with its removable side plates and disposable ink liner.

Lever settings are fast and accurate for precise ink control to aid in printing solids and screens, avoiding ghosting or inconsistent densities.

Utilizing a disposable plastic liner, the Kompac Kwik Kolor eliminates metal to metal contact to the ink fountain roller, preventing scoring which results in leaking or uneven ink distribution.

For about the same as it costs to replace a worn fountain roller, many presses can be easily upgraded to the Kompac Kwik Kolor.

Start taking advantage of the time and money savings today!

Each Kompac Kwik Kolor includes a new hardened fountain roller to ensure accurate ink distribution.

- Lever controlled ink zones for fast start-up and paper waste reduction
- Disposable ink liners for quick clean-up and color change
- Numerical settings can be recorded for repeat jobs
- Improved print quality
- Easy to calibrate
